# SPIDERHAND®

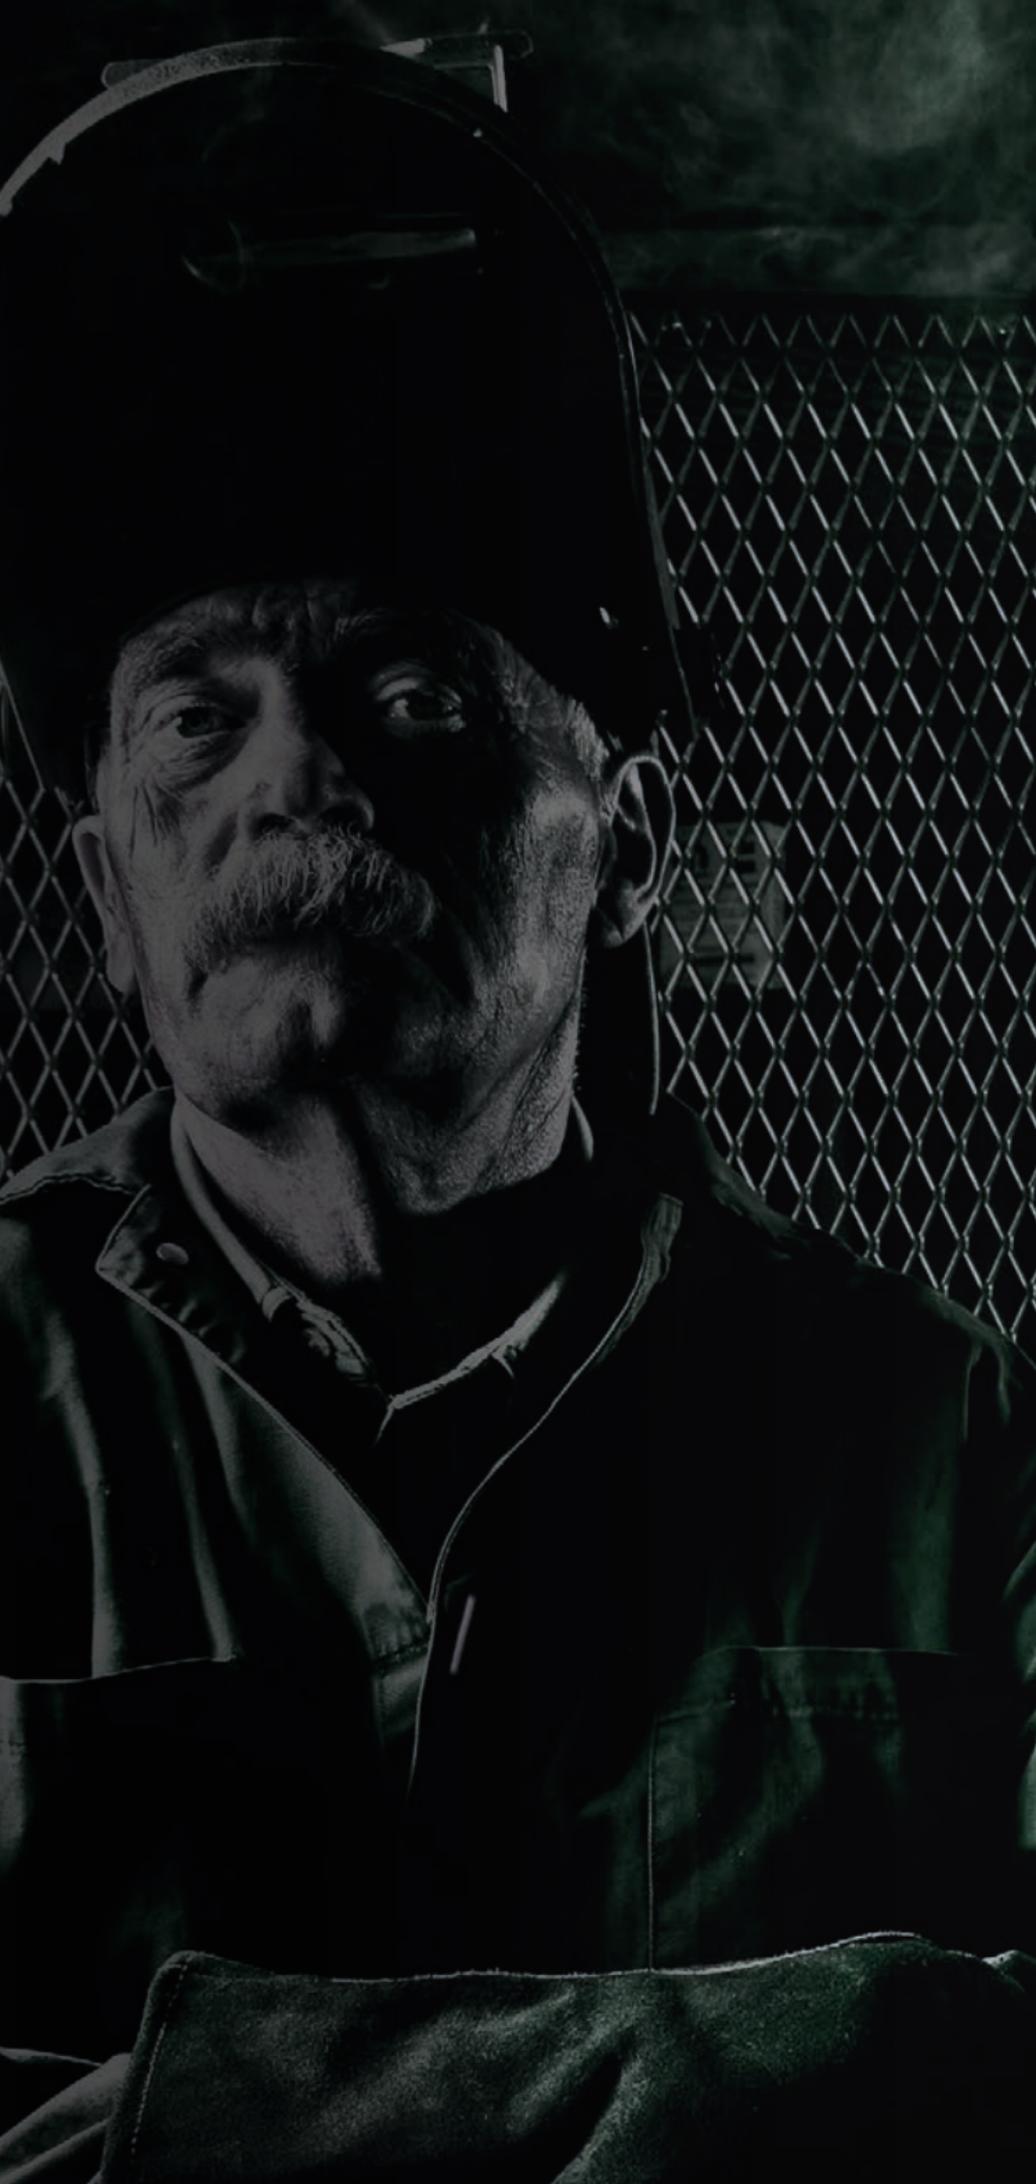

Our PREMIUM WELDING GLOVES are the perfect answer for heavy-duty custom and production welding.

These will provide you with the ultimate dexterity. Our gloves are all hand made with the finest and most durable Aniline leather and stitched with Kevlar® threading to guarantee optimal trigger and gun operation.

We try to achieve a perfect fit for every hand to protect your 27 bones, 36 joints, 33 muscles and your skin while you work on your perfect weld.

SPIDERHAND® is designed to work in harmony with the most sophisticated welding torches used in the industry. Picking up welding rods has never been so easy because the dexterity of our TIG gloves are of the highest standards.

**THE  
ULTIMATE  
TOUCH**

# TIG SUPREME

This glove is made of premium quality split **DEERSKIN** as a straight thumb model. With its extreme dexterity, this glove is unique. The flexible feel is a perfect fit for the finest TIG welders.

# TIG

- Extremely flexible
- Kevlar stitching
- Extra wrist protection
- Special straight thumb TIG model

# TIG SUPREME +

A very durable premium quality full grain **GOATSKIN** TIG glove with padded palm. Ideal for situations when welding on higher amperages with more heat than you are used to do with the deerskin glove.

**Approval: EN12477:2001+A1:2005 Type B**

- Comfortable padding
- Kevlar stitching
- Durable grain leather
- Special TIG cut index and thumb model

# MIG SUPREME

This premium quality full grain **GOATSKIN** palm MIG welding glove is a flexible and very durable glove. With the **COWHIDE** split back with fleece lining it can withstand higher temperatures, but with the goatskin palm it will preserve its flexibility and grip. MIG supreme is also an ideal glove for MMA welding.

- Keystone thumb model
- Extra wrist protection

# ARMGUARDS

SPIDERHAND® Armguards Made of the highest durable buffalo leather to protect heavy duty welder from being burned. These comfortable arm pads ensures protection of your arm from the heat and sparks during welding. The design is handcrafted to give it a personal touch. A musthave for your SPIDERHAND® gear.

Article numbers:	Description:	Packaging:
SPA3001	Armguard Black	1 pc.
SPA3002	Armguard Whiskey	1 pc.
SPA3003	Armguard Supreme	1 pc.

SPA3002

SPA3003

SPA3003

- Protects you from being burned
- Adjustable straps for a perfect fit
- Fits left or right arm

# TIG Heat Blocker

SPIDERHAND® TIG Heat blockers made to protect your hands/fingers from being burned. It allows you to place your hand close to the weld area to perfectly finish your joint.

Another advantage of these heat blockers is that you increase the lifetime of your TIG Supreme gloves!

Available in size standard Large and Extra Large (that fit 2 fingers)

Article numbers:	Sizes:	Packaging:
SPTFL	Size 9 (M)	6 pcs.
SPTFXL	Size 10 (L)	6 pcs.

- **Finish that long pass without burning your fingers**
- **Available in 2 sizes**
- **Increases the lifetime of your TIG glove**

## Different leathers mean different characteristics

**COWHIDE:** With its thickness cowhide is perhaps the most popular leather for MIG welding. Its thickness offers some degree of heat resistance with really good dexterity.

**GOATSKIN:** Goatskin is a very soft and flexible leather and offers a great sense of touch and great abrasion resistance. Used with full insulated lining this leather is ideal to combine with cowhide on the back of the hand for MIG welding.

**DEERSKIN:** The softest and most supple leather, deerskin offers a superior sense of touch. Because of the thickness of the leather, Deerskin will not offer the heat resistance you might want, but ideal in the lower amperages.

## SELECT YOUR SIZE

EN 420

Size	S/7	M/8	L/9	XL/10	XXL/11
CM	20,6	21,8	23	24,2	25

Measure your hand just above your thumb. This will give you the circumference that correspond with the size above.

## EN 388

Digit	Test resistance score	1	2	3	4	5	6
1st	Abrasion (no. cycles)	100	500	2000	800		
2nd	Blade cut (index)	1,2	2,5	5,0	10,0	20,0	
3rd	Tear (Newton)	10	25	50	75		
4th	Puncture (Newton)	20	60	100	150		
5th	TDM cut resistance (Newton)	A2	B5	C10	D15	E22	F30

## EN 407

Digit	Test resistance
1st	Burning Behavior
2nd	Contact heat
3rd	Convective heat
4th	Radiant heat
5th	Small splashed of molten metal
6th	Large quantities of molten metal

The level of each number (from 0 to 4) corresponds with the resistance level against the risk in question

**X** = not tested

**0** = below the minimum performance level

EN12477	Type	Type A	Type B
EN420	Dexterity *	1	4
EN1149-2	Electrical insulation	≥ 105 Ω	≥ 105 Ω
EN388	Resistance to abrasion (A)	2	1
	Resistance to cutting (B)	1	1
	Resistance to tearing (C)	2	1
	Resistance to puncture (D)	2	1
EN407	Resistance to flammability (A)	3	2
	Contact heat (B)	1	1
	Convection heat (C)	2	X
	Welding drops (E)	3	2

Gloves that meet standard EN 12477 must meet the following minimum requirements

**Don't waste any  
more time using  
uncomfortable  
and stiff welding  
gloves. It is time  
to protect yourself  
with high quality  
comfortable  
SPIDERHAND®  
gloves.**
